

Nomination letters for DAISY Award winner, Jeanne Dobryznski:

*Please describe a situation involving the nurse you are nominating that clearly demonstrates that he/she meets the criteria for the DAISY Award:*

“There is not just one situation with Jeanne. Jeanne demonstrates all Broadlawns values in every situation. She always seems to have the difficult patients, behavior and illness wise, most of the time. She exceeds in patience and compassion! She loves her job and she shows it by her smile and enthusiasm. If I ever get my RN I want to be like her. Or if I or anyone in my family comes to the ER I want her as the nurse because I know we will be treated with the upmost care and respect. Jeanne deserves to be acknowledged for her awesome nursing abilities and compassion. What I respect is the patience with our most difficult patients.

---

“There is not just one situation I can describe. Jeanne exemplifies all of the “Broadlawns Values” on a daily basis.

Jeanne display “Excellence” with her quick critical thinking and by the way she double and triple checks her orders, patient identifiers, etc.

“Compassion” is the way I would describe the way Jeanne treats every single patient that comes through our door. Whether they are mad, or obscenely drunk, she treats every one with dignity and respect.

Broadlawns often has nursing students doing rotations in the ED and for the ones that use the weekend schedule, Jeanne is always the preceptor. She has a vast knowledge of nursing with emphasis on the Emergency Department. She carefully explains all the orders to the students to assist them in their “Learning” and answers all questions. She takes a lot of time with these students to make the most of their ED experience.

The pride in her job and willingness to help anyone out demonstrates Jeanne’s “Leadership” skills. She knows the ins and outs of our department and uses this to help not only her patients but also co-workers.

Jeanne displays the “Broadlawns values” not only here at work, but also in her everyday life. I would hope that if I would ever have a situation that requires medical attention that I would be lucky enough to have her to take care of me.”
